

MARCO SERFONTEIN

• Junior Developer •

ABOUT ME

I'm a third-year university student currently studying at IIE MSA Ruimsig with some freelance experience under my belt; this includes designing Wix websites with basic knowledge of SEO and managing a website. I am currently studying how to improve my website design and development skills to broaden my knowledge base. I'm willing to learn any new skills or programming languages to improve my skills even further.

PERSONAL GOALS

Within the next few years, I would like to expand my programming knowledge, especially in Java and C#, or any new languages I will need in the future. My ultimate goal is to become a full-stack C# developer. I plan to educate myself in the use of 'unity' and design my own games in the near future. This will be done as a technical challenge, as well as to gain more experience in C#.

FREELANCE WORK

KLS Media

- Website Design(Wix.com)
